

I am a fairly new subscriber to XM radio (less than a year). I love it!!! Yes, I pay a monthly fee, but I am not subjected to all the advertisements and contests of local stations. With XM I get a variety of music, sports, comedy, weather and traffic, etc. The programming provided by XM is not available anywhere else. In fact, I tell everyone I meet about XM. That is how impressed I am with their service. XM radio is a service. I do not think that National Association of Broadcasters, NAB, should be able to decide what is offered on XM. I think that NAB is feeling the pinch of losing listeners, and should instead look at revamping their format to a more competitive one. I am completely against petition 04-160! I support XM and look forward to listening to them for years to come. XM radio should be allowed to broadcast all of their programing including traffic and weather.
DO NOT APPROVE NAB'S PETITION 04-160. IT IS UNCONSTITUTIONAL!!!
